Vision

Develop into a study program that embodies the community resilience and independence in managing disasters in the global era with the spirit of national defense in 2024

Description

Master Program of Disaster Management (Prodi MMB) is a study program under the Department of Environmental Engineering, Faculty of Mineral Technology (FTM), Universitas Pembangunan Nasional "Veteran" Yogyakarta (UPNVY). As MMB strives to fulfill its mission of educating, researching, and serving the community to develop professional human resources with a sense of identity, national spirit, and values, creativity will be able to address global challenges in disaster management.
